Education

Assam University Silchar

Bachelor of Technology

Aug 2016 – Sep 2020

Silchar, Assam

Experience

Posidex Technologies

Software Engineer

Jan 2022 – present

Hyderabad, Telangana

- Provided top-class application support to top Indian Banks for deduplication product, addressing and resolving application issues to ensure smooth business operation.
- Collaborated with development teams to identify and implement bug fixes, performance improvements, and feature enhancements.
- Documented support processes and created knowledge base articles to aid both end-users and team members.
- Conducted in-depth analysis of user-reported problems, offering solutions that improved product reliability and user satisfaction.
- Recognized and appreciated by the team manager for exceptional analytical skills.

Alien Brains

Front End Web Development Intern

June 2019 – July 2019

Kolkata, West Bengal

- Assisted in developing and maintaining web applications using HTML, CSS, and ReactJS.
- Contributed to the design and implementation of responsive UI components and interactive features.
- Participated in code reviews and team meetings, gaining valuable insights into best practices and development workflows.

Projects

Interactive Web Interface / *React JS, React Redux & Tailwind CSS*

September 2024

- Created responsive web app using React JS, & React Router ensuring cross-browser compatibility on multiple devices.
- Developed a dynamic web application using React Js, Tailwind CSS, & React Redux for managing complex props & global state of the web app.
- Designed Shimmer UI & implemented lazy loading concept for performance optimization of data driven UI using live third-party API.
- Implemented react hooks for functional components props & state management.
- Implemented client-side routing, dynamic routing, & route protection using React Router.

Currency Converter Web App / *HTML, Bootstrap 5, & JavaScript*

June 2024

- Developed a currency converter web application using Bootstrap 5 and JavaScript. Integrated third-party public APIs to fetch and display country flags and currency values.
- Implemented JavaScript's async/await and Promise concepts to handle asynchronous data fetching.
- Enabled users to view and convert currencies from various countries.
- Designed the interface to dynamically update with the selected country's flag and currency values.

Personal Portfolio Website / *HTML, CSS3, & JavaScript*

June 2024

- Built a personal portfolio website utilizing HTML, CSS, and JavaScript, showcasing various projects and skills.
- Implemented interactive features and optimized the website for fast load times and improved user experience.
- Created a fully responsive blog layout with only HTML and CSS, featuring media queries for different screen sizes.

Technical Skills

Programming Languages: JavaScript (ES6+), HTML5, CSS3, Bootstrap 5, & Oracle SQL

Web Development Technologies: React JS, React Router, React Redux, React Testing Library & Tailwind CSS

Familiar With: Linux, git, GitHub, Parcel, Babel & JSX

Developer Tools: VS Code, Sublime, IntelliJ, React DevTools, & Chrome DevTools

Leaderships & Achievements

- Attended workshops on advanced JavaScript frameworks and responsive design techniques.
- Recognized and appreciated by the team manager for exceptional analytical skills.
- Managed a team of 3 Software Engineers & a trainee for looking into IDFC De-duplication Application.
